

HQSYN16 - Task #3690

Task # 3672 (Assigned): RA1d - Automatic cleaning of speech corpora

Annotation error detection

14.01.2016 10:02 - Matoušek Jindřich

Status:	Closed	Start date:	01.01.2016
Priority:	Normal	Due date:	16.01.2017
Assignee:	Matoušek Jindřich	% Done:	100%
Category:		Estimated time:	0.00 hour
Target version:	RA1: Analysis of artifacts in synthetic speech		

Description

Research related to the detection of annotation errors (mostly related to gross segmentation errors) in TTS corpora.

Subtasks:

Task # 3687: Propose single anomaly detectors	Closed
Task # 3691: Propose combination of several detectors - voting detector	Closed
Task # 3692: Influence of the number of anomaly examples used for crossvalidation on de...	Closed
Task # 3693: Influence of the number of normal examples used for training on detection ...	Closed
Task # 3752: Influence of train/test splits on detection accuracy	Closed
Task # 3757: Simultaneous training of single detectors within a voting detector framework	Closed
Task # 3808: Submit a paper for TSD2016 (D)	Closed
Task # 3813: Submit a paper for INTERSPEECH2016 (D)	Closed
Task # 3899: Submit a paper on anomaly-based annotation errors detection (Jimp)	Closed
Task # 4128: Final listening test based evaluation of annotation error detection	Closed
Task # 4129: Synthesize & log a large portion of text by TTS system with annotation errors	Closed
Task # 4130: Prepare words with detected annotation errors	Closed
Task # 4131: Select utterances containing units with detected annotation errors	Closed
Task # 4132: Synthesize the selected utterances by TTS system with/without the annotati...	Closed
Task # 4133: Prepare preference (A/B) listening test	Closed
Task # 4146: Prepare test stimuli for listening test	Closed

History
