| Description | | | |
| Vypracovat popis řešení projektu - část RA3d (související úkoly: #4255 , #4256). | | | |
| Počet znaků: 100 | | | |
| <i>Pozn.: V plánu je až rok 2018, takže není nutné "vykazovat" za rok 2017. Přesto pokud máme nějaká dílčí zjištění, můžeme je již teď zmínit.</i> | | | |

History

#1 - 20.12.2017 16:55 - Skarnitzl Radek

- Status changed from New to Resolved

- % Done changed from 0 to 100

Work is in progress on a data-driven formalization of the very specific melodic contours of Czech wh- questions, as well as of phonetic word parsing, whose more complex details (like joining two two-syllabic words into one stress group) have never been addressed. A paper addressing the properties of Czech stress and, most importantly for this project, duration discontinuities across stress group boundaries, has been submitted as an impact journal paper.

#2 - 20.12.2017 21:53 - Matoušek Jindřich

- Status changed from Resolved to Closed
