#### Description

In the directory artic/Experiments/ZH\_FixedCorpora, there are fixed ASF files for 4 speakers.

Various types of modifications have been performed, e.g. changes of prosodeme types, insertion/deletion of pauses, breath and glottal stops, changes of voicedness, etc.

Dan, can you please create the unit-selection-synthesis logs for the original and modified ASFs.

Maybe, in case you have synthesis logs for the actual or some recent version (in the case of minor changes) of some voices, they could be used instead of creating new logs for the original ASFs.
